

Internship Fraud Investigation

SkillzenLoop / ClinchEdge / AtlysBridge

Investigator	Ishaan Malhotra
Date	23 June 2026
Target Entities	SkillzenLoop, ClinchEdge, AtlysBridge
Type	Online Internship Fraud / Paid Enrollment Scam
Classification	PORTFOLIO —OSINT CASE STUDY
Status	INVESTIGATION COMPLETE

This document contains findings from a personal OSINT investigation. All data was collected from publicly available sources. No unauthorized system access was performed.

SECTION 1

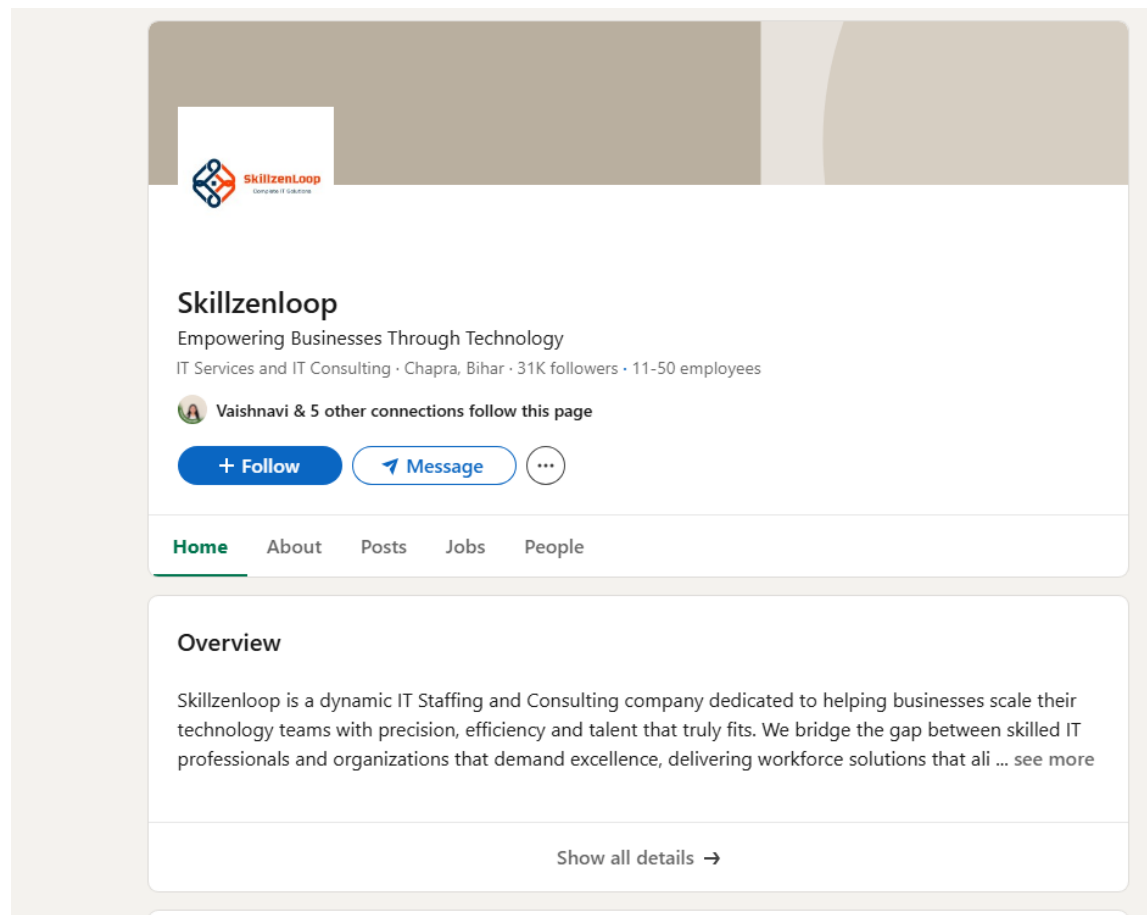

Initial Discovery

The investigation began after encountering an internship posting from SkillzenLoop on a job listing platform. The advertisement promoted a paid internship with a stipend, completion certificate, and letter of recommendation. Initial details appeared credible enough to warrant deeper scrutiny — the listing used professional language and referenced structured training and mentorship.

Rather than applying immediately, a preliminary surface-level check was conducted that flagged enough inconsistencies to justify a full investigation.

Screenshot 1 — Original Internship Posting

SS-01 SkillzenLoop Internship Listing

The screenshot displays a LinkedIn profile for SkillzenLoop. At the top, there is a header image with the SkillzenLoop logo on the left, which consists of a stylized 'S' made of blue and orange geometric shapes, followed by the text 'SkillzenLoop' and 'Empowering IT Solutions' in smaller text. Below the header, the profile name 'Skillzenloop' is shown in bold, followed by the tagline 'Empowering Businesses Through Technology'. Underneath, it lists 'IT Services and IT Consulting · Chapra, Bihar · 31K followers · 11-50 employees'. A small circular profile picture of a person is followed by the text 'Vaishnavi & 5 other connections follow this page'. Below this, there are three buttons: a blue '+ Follow' button, a blue 'Message' button with an envelope icon, and a grey circle with three dots. A horizontal menu bar contains the links 'Home', 'About', 'Posts', 'Jobs', and 'People', with 'Home' being the active link. The main content area is titled 'Overview' and contains a paragraph: 'Skillzenloop is a dynamic IT Staffing and Consulting company dedicated to helping businesses scale their technology teams with precision, efficiency and talent that truly fits. We bridge the gap between skilled IT professionals and organizations that demand excellence, delivering workforce solutions that ali ... see more'. At the bottom of this section, there is a link 'Show all details →'.

PURPOSE

Documents the entry point of the investigation. The internship posting is the bait — this section establishes what was advertised and why it appeared credible enough to investigate.

Website Investigation

A systematic review of the SkillzenLoop website was conducted to determine whether it represented a genuine operational company or was assembled from a generic website template. Template-based sites are commonly used by fraudulent operations because they can be deployed quickly at minimal cost, providing the appearance of legitimacy without the substance.

Screenshot 4 — Placeholder Privacy Policy

SS-04 Privacy Policy Page — Generic / Unedited Template Content

[Jobs](#) [About Us](#) [Services](#) [Team](#) [Contact](#)

The explanations and information provided on this page are only general and high-level explanations and information on how to write your own document of a Privacy Policy. You should not rely on this article as legal advice or as recommendations regarding what you should actually do, because we cannot know in advance what are the specific privacy policies you wish to establish between your business and your customers and visitors. We recommend that you seek legal advice to help you understand and to assist you in the creation of your own Privacy Policy.

Privacy Policy - the basics

Having said that, a privacy policy is a statement that discloses some or all of the ways a website collects, uses, discloses, processes, and manages the data of its visitors and customers. It usually also includes a statement regarding the website's commitment to protecting its visitors' or customers' privacy, and an explanation about the different mechanisms the website is implementing in order to protect privacy.

Different jurisdictions have different legal obligations of what must be included in a Privacy Policy. You are responsible to make sure you are following the relevant legislation to your activities and location.

What to include in the Privacy Policy

Generally speaking, a Privacy Policy often addresses these types of issues: the types of information the website is collecting and the manner in which it collects the data; an explanation about why is the website collecting these types of information; what are the website's practices on sharing the information with third parties; ways in which your visitors and customers can exercise their rights according to the relevant privacy legislation; the specific practices regarding minors' data collection; and much, much more.

To learn more about this, check out our article "[Creating a Privacy Policy](#)".

Screenshot 5 — Partner Section with Default Text

SS-05 Partner / Team Section Showing Unedited Placeholder Text

Our Partners

This is your Partners section introductory paragraph. It's a great space to talk about the companies you collaborate with on specific projects. Add your partners' logos below to create a quick and effective visual representation of your relationships.

● Client Feedback

"SkillzenLoop exceeded our expectations with their innovative IT solutions and industry knowledge. They have been a true partner in our journey towards digital excellence."

● David Lee

"The expertise and professionalism of the SkillzenLoop team are unparalleled. Their strategic guidance and hands-on approach have been instrumental in achieving our IT goals."

Screenshot 6 — Source Code: Placeholder Email Addresses

SS-06 Page Source Code — info@mysite.com and example@mysite.com Embedded

```
(ishaan@kali)-[~]  
$ grep -oP '[A-Za-z0-9._%+-]+@[A-Za-z0-9.-]+\.[A-Za-z]{2,}' home.html | sort -u  
18d2f96d279149989b95faf0a4b41882@sentry-next.wixpress.com  
5d1795a2db124a268f1e1bd88f503500@sentry.wixpress.com  
605a7baede844d278b89dc95ae0a9123@sentry-next.wixpress.com  
contact@skillzenloop.com  
example@mysite.com  
info@mysite.com
```

FINDING — TEMPLATE WEBSITE — NEVER PROPERLY CONFIGURED

The website source code contained hardcoded placeholder email addresses (info@mysite.com, example@mysite.com) that are part of the original website template and were never replaced. The privacy policy and partner sections similarly contained unedited boilerplate. A functioning company would have completed this configuration before going live.

PURPOSE

Establishes that the website is not an organic company presence but a template installation with minimal customization. This calls into question whether the company has any real operational existence.

Infrastructure Analysis

Technical investigation of the domain and hosting infrastructure was conducted to establish the age, ownership, and configuration of web properties associated with SkillzenLoop. Domain age and registration transparency are reliable signals of an organization's legitimacy — fraudulent operations typically use recently registered domains with privacy-shielded ownership to avoid accountability.

FINDING — RECENTLY REGISTERED DOMAIN — OWNERSHIP ANONYMOUS

The domain was registered recently, inconsistent with the company's implied operational history. WHOIS ownership details were hidden behind a privacy protection service, making it impossible to identify the actual registrant. Legitimate companies with established histories have older, verifiable domains with traceable registration.

PURPOSE

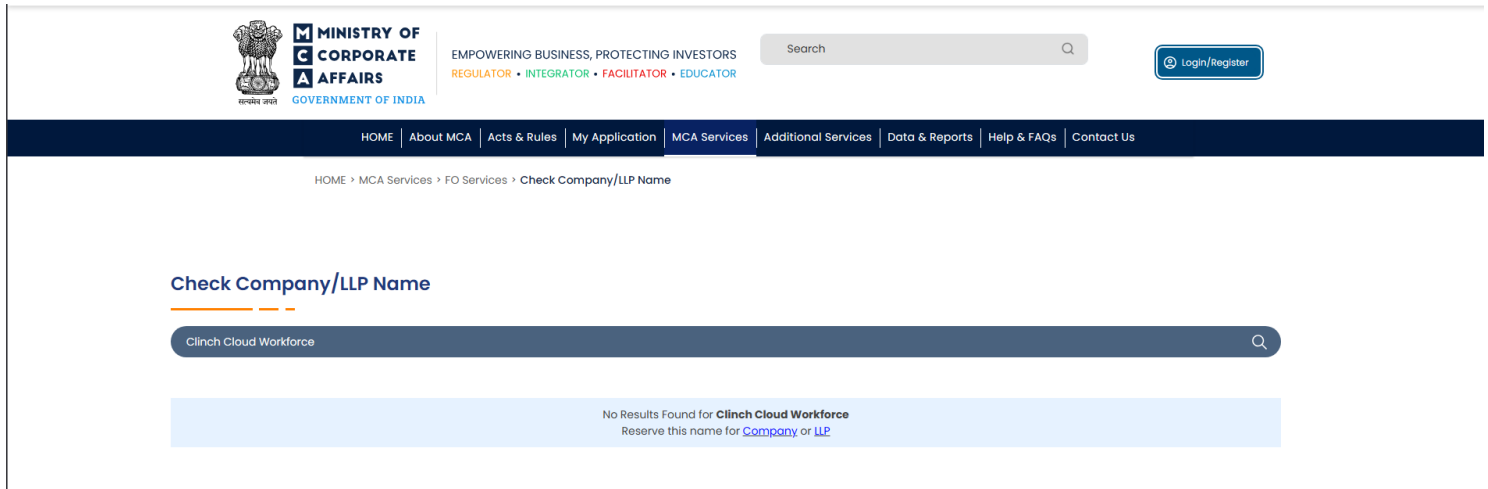

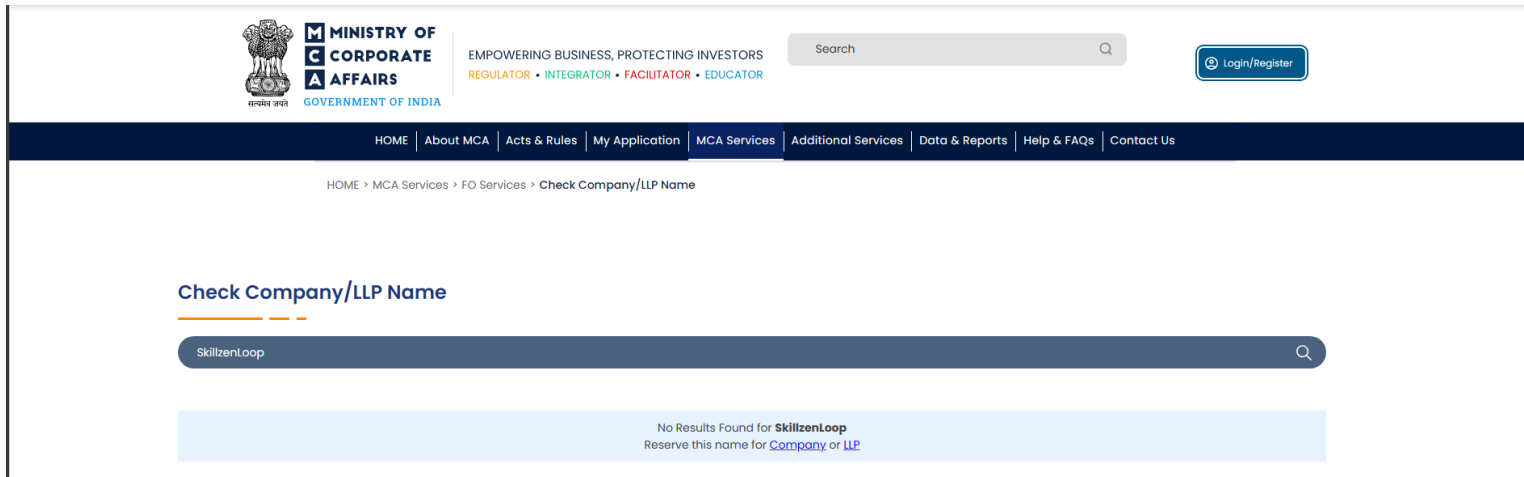

Domain age and registration transparency are technical fraud indicators. Anonymous, recently registered domains are operational hallmarks of entities set up specifically to run short-term extraction schemes before being abandoned.

Company Verification

Searches were conducted on the Ministry of Corporate Affairs (MCA) portal to verify whether SkillzenLoop and its associated entities are legally registered in India. Additionally, the company's listed address was cross-referenced with Google Maps to check for any verifiable physical presence.

Screenshot 9 — MCA Search Results

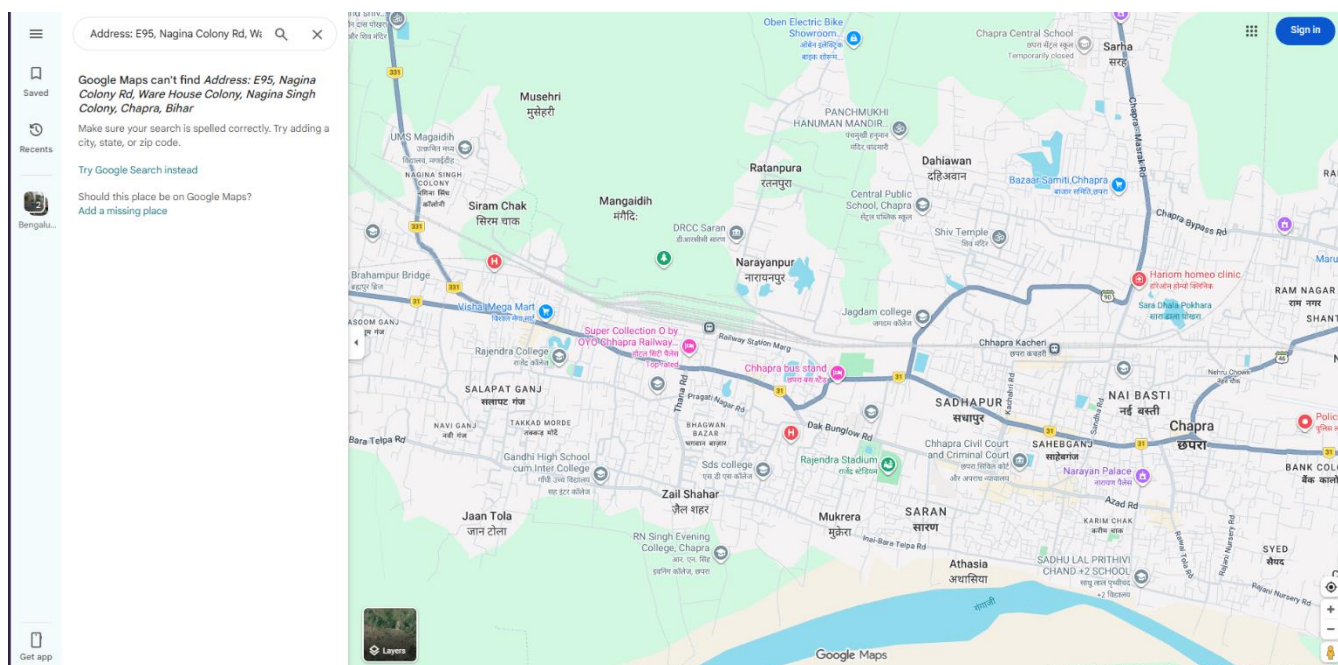

SS-9 MCA Portal — Company Name Search Result

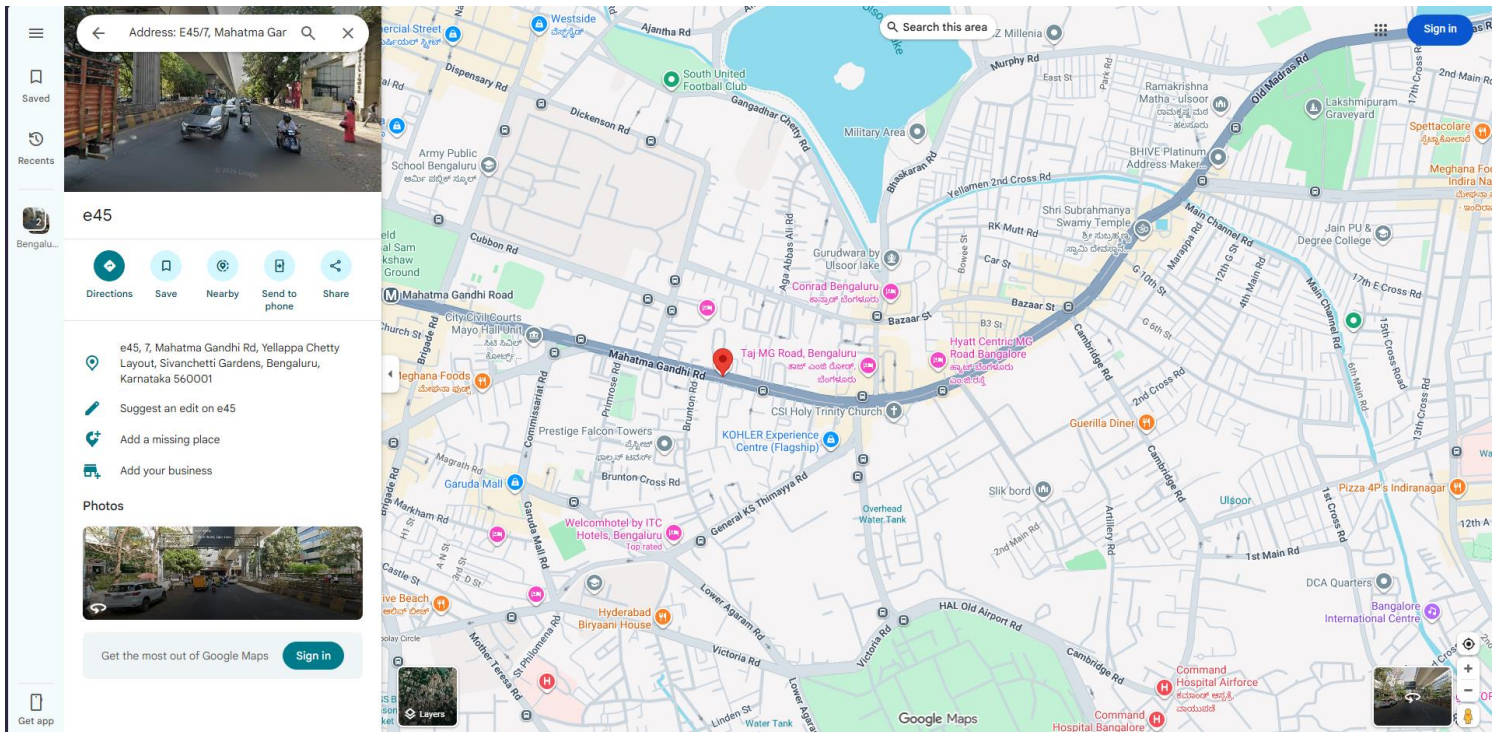

SS-10 Registered / Listed Address as Shown on Website**SS-10** Registered / Listed Address as Shown on Website

SS-11 Google Maps — Physical Location Check of Listed Address

SS-11 Google Maps — Physical Location Check of Listed Address

FINDING — NO VERIFIABLE CORPORATE REGISTRATION

MCA searches returned no matching results for the company name or any of its variants. The listed address, when verified on Google Maps, did not correspond to a legitimate corporate office. These two findings together mean the entity has no established legal standing as a registered company in India.

PURPOSE

MCA registration is a legal requirement for companies operating in India. Absence of registration means no legal accountability — any certificate, LOR, or stipend promised by an unregistered entity is entirely unenforceable.

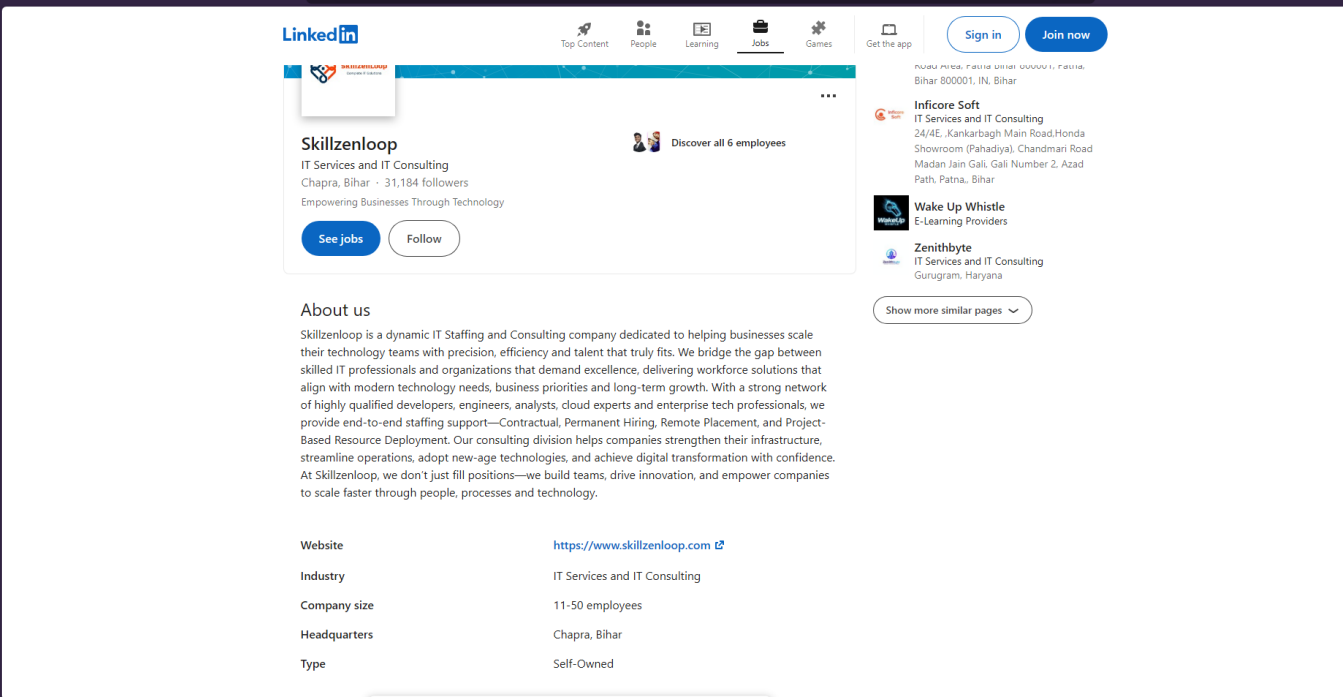

LinkedIn OSINT

LinkedIn was investigated to assess the company's social footprint, employee depth, and organizational credibility. Social presence is a strong authenticity signal — real companies accumulate followers, employee histories, and engagement organically over time. Fraudulent operations tend to have thin, recently created profiles with few verifiable employees.

Beyond SkillzenLoop itself, a pattern search was also conducted on LinkedIn to identify similar entities using the same operational model.

About the job

Cyber Security Intern | Network Security | Ethical Hacking | Information Security | Remote

SkillzenLoop is seeking Cyber Security Interns who are eager to explore digital security, cyber risk management, and secure technology practices. This internship offers practical exposure to security monitoring, vulnerability assessment, and cybersecurity operations through implementation-oriented projects in a remote environment.

Employment Type: Full-Time Internship
Location: Remote
Internship Duration: 1–3 Months
Monthly Stipend: ₹16,100

About the Opportunity

The Cyber Security Intern will support initiatives focused on strengthening information security by assisting with security reviews, documentation, compliance activities, and research related to emerging cyber threats.

Key Responsibilities

- * Assist in monitoring security events and identifying unusual activities
- * Support vulnerability assessment and basic security review tasks
- * Help document security observations and technical findings
- * Participate in compliance and cybersecurity awareness initiatives
- * Maintain security-related reports and operational records
- * Research emerging threats and recommend best practices
- * Collaborate with technical teams on security improvement projects

Eligibility Criteria

- * Pursuing or completed a Bachelor's degree in Cyber Security, Computer Science, Information Technology, or a related discipline
- * Interest in information security and digital risk management
- * Comfortable working remotely with collaborative teams
- * Willingness to build practical cybersecurity knowledge

FINDING — THIN SOCIAL PRESENCE — RECENTLY CREATED PAGE

The LinkedIn page had a low follower count and appeared to have been created recently. Employee profiles associated with the company were sparse, with limited professional histories predating the company's supposed founding. This pattern is inconsistent with a functioning company and consistent with a profile created specifically to lend credibility to a scam operation.

WIDER PATTERN — MULTIPLE ENTITIES IDENTIFIED

During LinkedIn OSINT, several other companies were identified operating near-identical models — the same internship advertisement format, the same instant-selection workflow, the same paid enrollment structure, and the same promises of certificates and LORs. These include entities with different brand names but structurally identical operations.

Common characteristics shared across all identified entities:

- Recently created LinkedIn pages with many follower counts
- Job postings that closely mirror SkillzenLoop's language and structure
- No verifiable employee history predating the company's creation
- No MCA registration or traceable corporate identity
- Internship advertisements across multiple platforms simultaneously
- Communication routed through WhatsApp rather than official channels
- Enrollment fees between ₹999 – ₹2,499 depending on the 'program'

This is not an isolated operation. SkillzenLoop, ClinchEdge, and AtlysBridge appear to be part of a broader network of similar entities, possibly run by overlapping individuals, all targeting the same demographic: recent graduates and students who are actively job-seeking and may be unfamiliar with standard recruitment norms.

PURPOSE

Social footprint analysis reveals both the entity's credibility and its connection to a wider operational network. The identification of multiple companies using identical tactics confirms this is a systemic, organized fraud pattern — not an isolated incident.

Application Workflow

An application was submitted through the SkillzenLoop internship form to map the complete process flow. The objective was to document exactly how the operation unfolds from initial contact — paying particular attention to any redirection to third-party entities not disclosed in the original posting.

Screenshot 16 — Email Redirection to ClinchEdge / AtlysBridge

SS-16 Post-Application Email from ClinchEdge / AtlysBridge

FINDING — MULTI-BRAND REDIRECTION AFTER APPLICATION

Applying through SkillzenLoop resulted in communications from ClinchEdge and AtlysBridge — entirely separate brand names not disclosed at the point of application. This brand-switching tactic is characteristic of coordinated fraud networks. It distributes liability across multiple named entities and makes the operation harder to trace or shut down as a single unit.

PURPOSE

Mapping the application workflow exposes the operational architecture. Legitimate companies communicate through consistent, branded channels. Unexplained redirection to unknown third-party brands after submission is a structural fraud indicator.

Selection Process

A selection email was received within a suspiciously short timeframe following submission — with no interview, no technical screening, no aptitude assessment, and no recruiter interaction of any kind. The welcome letter that followed introduced the internship terms and, for the first time, a financial requirement.

Screenshot 17 — Selection Email

SS-17 Selection Email — Instant Acceptance with No Screening

Screenshot 18— Welcome Letter

SS-18 Welcome Letter — Certificate, LOR, Stipend Promises, and Fee Requirement

Dear Arthur Bing

Subject: Cyber Security Internship

We are pleased to inform you that you have been selected for the Internship Program at Clinch Cloud Workforce. **You may commence your internship on any date of your choice.** The internship offers flexible onboarding to accommodate your availability. **You are requested to inform us of your preferred joining date in advance to ensure a smooth and efficient onboarding process.**

Your application and demonstrated skills reflect strong potential and enthusiasm, and we are delighted to welcome you to our organization. During the course of this internship, you will gain valuable hands-on experience across various domains through structured training and practical exposure.

Internship Benefits:

Upon successful completion of the Internship Program, you will be awarded:

1. **Internship Completion Certificate**, recognizing your learning and contribution
2. **Letter of Recommendation (LOR)**, highlighting your performance, dedication, and skill set
3. **Stipend And Appreciation Letter** from the company

With reference to your application, we congratulate you on being selected for the Internship Program with Clinch Cloud Workforce. The internship duration will be four (4) weeks, effective from your selected start date. We are confident that this program will contribute meaningfully to your professional growth.

Basic Pay	Rs.	22,500/- Per Month.
Performance Incentives	Rs.	As per work performance
Internet Allowances	Rs.	500/- Per Month.
Gross Salary	Rs.	23,000/- Per Month.

Total In-hand salary : Rs. 23,000/- Per Month

You will be assigned a client and project upon onboarding. A stipend will be provided upon successful completion of the assigned project

To “CONFIRM” your enrolment, you need to pay 1699/- the Internship fees online through the [following link Internship Form](#)

through the payment method shared.

Upon successful payment confirmation, a confirmation email will be sent immediately. **Login credentials and complete onboarding details**, including the platform link, internship session access, and mentor information, will be shared by **End of Day**.

Flexible Joining Date: You may choose your joining date as per your convenience.

The internship will include an orientation and structured training modules focused on developing technical and professional skills. The program emphasizes hands-on application of concepts learned during training. Project details will be shared on or before the commencement of the training period.

Your appointment and engagement during the internship shall be governed by the **terms and conditions outlined in Annexure – B**.

We extend our best wishes for a successful learning journey and assure you of our continuous support throughout the program.

Career Opportunities

Note: The internship duration is one month. Upon successful completion, candidates will be considered for opportunities with our internal team or client organizations, subject to performance evaluation and interview clearance. High-performing candidates may be eligible for full-time roles with compensation of up to ₹5 LPA, based on merit and organizational requirements.

To CONFIRM your enrolment, you are required to pay 1699/- online through the [following link Internship Form](#)

Yours truly

Clinch Cloud Workforce

Page 2 / 4

Annexure - B

You shall be governed by the following terms and conditions of service during your Internship with Clinch Cloud Workforce, and those may be amended from time to time.

1. You are being selected for one month of Internship. During Internship you would be responsible for completing the training modules on our partner platform and complete the live project thereafter as per the project requirement specified in the project proposal. After completion of your Internship you will get project to work. Once you submit the project then you will get your stipend as per Annexure -A.

2. Flexible Joining Date: You may choose your joining date as per your convenience, and the duration of the Internship would be 4 Weeks (One month). You will receive a stipend because we assign you the project as well as the client. Once you have complete your project. Your stipend will be credited in your bank account.

3. All the work that you will produce at or in relation to Clinch Cloud Workforce will be the intellectual property of Clinch Cloud Workforce. You are not allowed to store, copy, sell, share, and distribute it to a third party under any circumstances. Similarly you are expected to refrain from talking about your work in public domains (both online such as blogging, social networking site and offline among your friends, college etc.

4. You will be using the computer throughout the program with good internet connection.

5. You will be working remotely for the duration of the Internship and submit the same on our Learning Management System (LMS).

6. At the end of the training program, candidates may be offered project opportunities based on their performance in the final project assessment. Allocation will be done considering overall consistency, skill application, and project readiness.

Website : [Clinch Cloud Workforce](#)

Page 4 / 4

FINDING — UNIVERSAL INSTANT SELECTION — NO EVALUATION CONDUCTED

No assessment of any kind was conducted before selection. The process was automated and instant — which means selection is universal. In a legitimate internship, selection depends on candidate quality. Here, everyone who applies gets selected because revenue depends on enrollment volume. This is the clearest structural proof that the 'internship' is a purchase funnel, not a hiring process.

PURPOSE

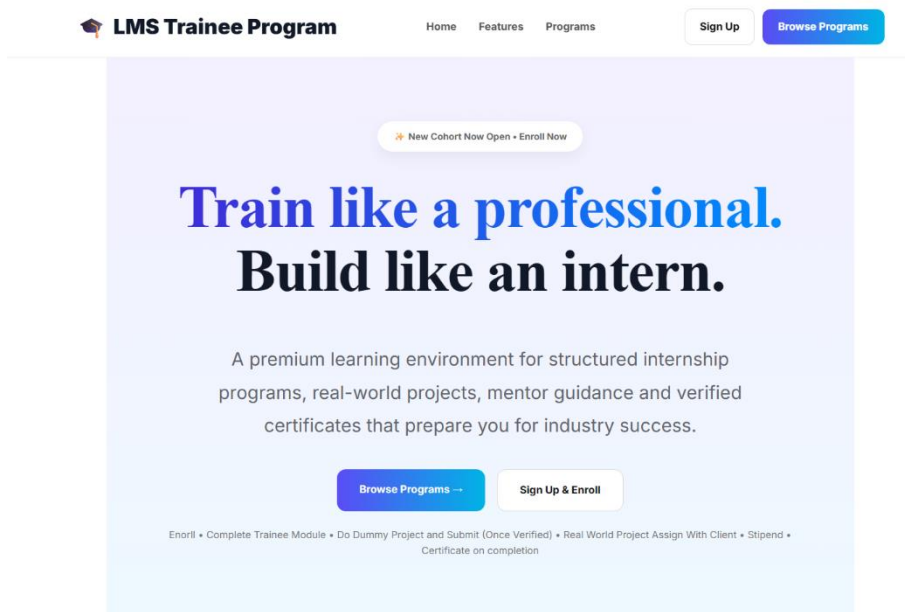

The selection workflow is central to the fraud. Legitimate internships evaluate candidates. When selection is instant and requires no merit, the operation is not recruiting — it is selling.

LMS Investigation

Following selection, access to a Learning Management System was presented as the internship environment. The LMS contains training modules, an internship simulation, and a certificate application form — components designed to make the paid enrollment appear to be a legitimate educational product rather than a fee extraction scheme.

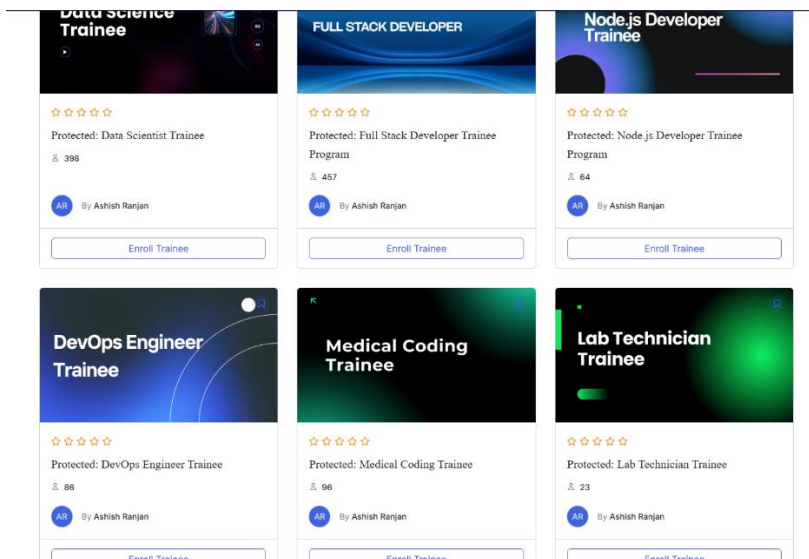

Screenshot 19 — LMS Trainee Portal

SS-19 LMS Dashboard / Trainee Portal Interface

Screenshot 20 — Internship Simulation Page

SS-20 LMS Internship Simulation / Course Module Listing

Screenshot 21 — Certificate Application Form

SS-21 Certificate Application Form Within the LMS

The screenshot displays a Google Forms interface titled "Internship Certificate Application Form". The form includes a header section with a warning icon and text: "The name, email, and photo associated with your Google account will be recorded when you upload files and submit this form." Below this is a red asterisk indicating a required question. The form fields are as follows:

- Full Name ***: A text input field with the placeholder "Your answer".
- Email ID ***: A text input field with the placeholder "Your answer".
- Contact Number ***: A text input field with the placeholder "Your answer".
- Internship Start Date ***: A date picker field with the placeholder "dd-mm-yyyy". A note below the field states: "Please ensure the date is entered correctly, as the same date will be mentioned on the internship certificate."
- Internship End Date ***: A date picker field with the placeholder "dd-mm-yyyy". A note below the field states: "Please ensure the date is entered correctly, as the same date will be mentioned on the internship certificate."
- Internship Position ***: A text input field with the placeholder "Your answer".
- Batch Code (Mentioned in Letter)**: A text input field with the placeholder "Your answer".
- Submit Your Welcome Letter**: A section with the text "Upload 1 supported file. Max 10 MB." and an "Add file" button.

At the bottom of the form, there are "Submit" and "Clear form" buttons. Below the form, a footer section contains the text: "Never submit passwords through Google Forms. This content is neither created nor endorsed by Google. - Contact form owner - Terms of Service - Privacy Policy. Does this form look suspicious? Report." The Google Forms logo is also present at the bottom.

FINDING — ALL LMS CONTENT GATED BEHIND ENROLLMENT PAYMENT

Every element of the LMS — training content, simulation, certificate, and LOR — is inaccessible until the enrollment fee is paid. The training content does not exist as a genuine learning experience; it exists to justify the payment and reduce the likelihood of refund demands by giving the appearance of delivered value.

PURPOSE

The LMS is the product being sold. Analyzing its structure exposes the commercial intent — training content is packaged as an internship to lower the psychological barrier to payment. The fee-gated model confirms revenue collection, not talent development, is the primary objective.

Fee Discovery

This section contains the most significant evidentiary material of the investigation. The mandatory enrollment fee — collected before any access, work, or training occurs — is the definitive proof that this operation is a paid enrollment scheme and not a legitimate internship.

Screenshot 22 — Welcome Letter Showing ₹1,699

SS-22 Welcome Letter — ₹1,699 Enrollment Fee Clearly Visible

Career Opportunities

Note: The internship duration is one month. Upon successful completion, candidates will be considered for opportunities with our internal team or client organizations, subject to performance evaluation and interview clearance. Note: The confirmation email will be shared within one hour, while the login credentials will be delivered by End of Day (9:00 PM today).

By making the payment, you agree to our Refund Policy. You can also review [Refund policy Here](#)

CRITICAL FINDING — PAID ENROLLMENT CONFIRMED

The enrollment fee of ₹1,699 is a mandatory prerequisite for accessing the LMS, training modules, mentors, internship certificate, and letter of recommendation. Without payment, nothing is accessible.

Legitimate internships never charge candidates. The fact that payment is collected before any work, learning, or evaluation occurs — and that selection required zero skill assessment — confirms this is a revenue-generating enrollment scheme disguised as a career opportunity.

Payment collection via WhatsApp screenshot — rather than a formal payment gateway that generates receipts — further indicates the operation lacks the accountability infrastructure of a legitimate company and is structured to avoid paper trails.

PURPOSE

Screenshots 23–26 collectively document the full payment funnel: advertise an internship → select everyone instantly → present fee as onboarding → collect payment through an informal, unaccountable channel. This is the operational signature of a paid internship fraud scheme.

Final Assessment

Eight phases of investigation, 26 pieces of evidence, and at least three distinct entity names all point to the same conclusion: SkillzenLoop — operating in conjunction with ClinchEdge and AtlysBridge — runs a coordinated paid enrollment scheme that exploits the appearance of a legitimate internship to extract fees from job seekers, primarily recent graduates and students.

The operation is not isolated. LinkedIn OSINT identified multiple other companies using structurally identical tactics — the same advertisement format, the same instant selection, the same enrollment fee model, the same WhatsApp-based payment collection, and the same promises of certificates, LORs, and stipends that cannot be legally enforced by unregistered entities.

Claim vs. Reality

What Was Claimed	What Was Found
Free internship opportunity	₹1,699 mandatory enrollment fee
Competitive selection process	Zero screening — everyone selected instantly
Stipend offered	Stipend terms vague, no enforceable contract
Certificate and LOR on completion	Both gated behind payment, unenforceable
Established operating company	Domain recently registered, not MCA verified
Single company — SkillzenLoop	At least 3 brand names in the same operation
Professional communication	Payment collected via WhatsApp screenshot
Legitimate training program	LMS content exists to justify the payment, not for learning

Consolidated Red Flag Assessment

Each finding below is rated by severity based on its weight as a fraud indicator.

#	Finding	Category	Severity
1	Mandatory ₹1,699 fee before any access granted	Payment Model	CRITICAL
2	Zero skill screening — universal instant selection	Process Integrity	CRITICAL
3	Payment collected via WhatsApp — no official receipt	Accountability	CRITICAL
4	No MCA registration found for any entity in the network	Legal Standing	CRITICAL
5	Multiple brand names (SkillzenLoop, ClinchEdge, AtlysBridge) in single operation	Identity	HIGH
6	Domain recently registered with WHOIS privacy shield	Infrastructure	HIGH
7	All LMS content gated behind enrollment payment	Product Structure	HIGH

8	LinkedIn identifies similar entities using identical tactics	Network Scale	HIGH
9	Website contains unedited template placeholder emails	Website Integrity	HIGH
10	Listed address not verifiable as corporate office on Maps	Physical Presence	HIGH
11	Privacy policy and partner sections contain template content	Website Integrity	MEDIUM
12	Stipend terms vague with no enforceable contract provided	Terms Clarity	MEDIUM
13	LOR and certificate promised by legally unregistered entity	Enforceability	MEDIUM
14	Communication exclusively via WhatsApp, no official channels	Professionalism	MEDIUM

VERDICT

Do not pay. Do not enroll.

If you or others have already paid, file a complaint at cybercrime.gov.in and report the listings on the platform where they were found.
